1 Začetek

V glavo `.tex` datoteke vstavite `\usepackage{tikz}`. V telo dokumenta vstavite minimalni primer:

```
\begin{tikzpicture}
\draw (0,0) -- (1,2);
\end{tikzpicture}
```

Rezultat je slika:

V kolikor pri prevajanju latex ne najde datoteke `tikz.sty` je najbolje ročno namestiti naslednje pakete: `pgf`, `ms` in `xcolor`.
