

```

class Kompleksno {
    static .....

    // polja
    ...

    // konstruktorji
    public Kompleksno(....)
    { .... }

    :

    // objektne metode
    :
}

```

- Polja :
- private, public
 - private double re;

Konstruktor :

~~self~~ this

```

public Kompleksno (double x, double y) {
    this.re = x;
    this.im = y;
}

```

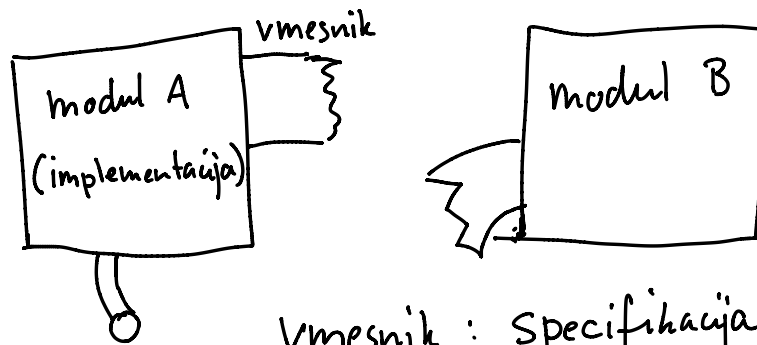

Metode :

```

public double abs() {
    return  $\sqrt{re * re + im * im}$ ;
}

```

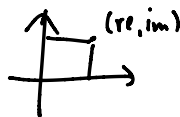

Vmesnik (interface)

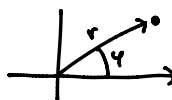

Vmesnik : Specifikacija

Vmesnik predpiše metode

Kompleksna
re, im

Kompleksna
re, im
